## About Us

### About *FairVote*

FairVote is a nonpartisan champion of electoral reforms that give voters greater choice, a stronger voice, and a representative democracy that works for all Americans.

FairVote has a proven record since 1992 as a trailblazer that advances and wins electoral reforms at the local, state, and national level through strategic research, communications and collaboration. Today we are the driving force behind advancing ranked choice voting and fair representation in multi-winner legislative districts that will open up our elections to better choices, fairer representation and more civil campaigns.

### About My Work

[VotingSite@gmail.com](mailto:VotingSite@gmail.com)

In 1990, John R. Chamberlin, and Samuel Merrill III gave me permission to use their sim results (pages 60-61) to advance a Condorcet-IRV rule. Throughout the 1990s I created the *PoliticalSim*<sup>™</sup> and *SimElection* software. They compared 30 single- and multi-winner rules from around the world and were used in a few universities. (Pages 46-55 show graphics from the simulation games.) By 1998 I had started the *Democracy Evolves* website. Then I helped FairVote.org as webmaster and librarian. I've helped Robert Tupelo-Schneck and Twin Oaks Community test Fair Share Voting for 10 years. This booklet summarizes *Accurate Democracy.com*.

My work aims for systemic changes (eg, pages 34-36) via better tools between people (eg, pages 33, 23, 25)
